

Laboratory Name: _____ Lab no. _____

Reported by: _____ Date: _____

Molecular PT sample instructions:

- The sample number is indicated on the sample.
- Indicate the method by which the sample has been processed. If the method uses a chromogenic agar, include the name and manufacturer.
- Indicate the results as positive, indeterminate, or negative. If indeterminate, provide clarifying information in the Comment box.
- Please complete the report form where applicable.
- Results can be submitted to CMPT electronically (www.cmpt.ca), by Fax (604-827-1338 or 1-866-580-2678) or by e-mail attachment (cmpt.path@ubc.ca).

Sample	Sample no.	Method	Result <small>(positive, indeterminate or negative)</small>	Comment (s)

CMPT Samples contain viable microorganisms and must be handled with the same diligence for biosafety as all clinical specimens. The enclosed samples are submitted for external quality assessment challenge. To gain the greatest benefit from these samples they should be processed, examined, interpreted and reported using the same practice and procedures as routinely performed in your laboratory.
